Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Doherty et al (US Pat. 6,856,506).

Regarding claims 1, 4, Doherty et al disclose a portable computer 10 and docking station locking structure comprising: a docking station 20, the docking station comprising a base 20, and a support arm 25 provided at a top side of the base 20, the support arm 25 having a supporting face 212 disposed at a front side thereof and a holding groove 214 disposed at a bottom side of the supporting face 212; and a portable computer 10 positioned in the holding groove 214 of the support arm 25 and rested on the supporting face 212; wherein, the docking station 20 comprises a lock 235 provided inside the support arm 25, the lock 235 comprising at least one locking member controlled to protrude outside the supporting face 212; the portable computer 10 has at least one lock hole 24

formed in a back side thereof adapted to receive the at least one locking member of the lock when protruded wherein the portable computer is a tablet PC (personal computer).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Doherty et al (US Pat. 6,856,506) in view of Hasegawa (US 2002/0033033).

Regarding claim 3, Doherty et al disclose all the subject matter of the claimed invention except for a key to control the lock locked/unlocked. However Hasegawaa discloses a key to control the lock locked/unlocked (see figure 1). Therefore, it would be obvious to one of ordinary skill in the art to modify the a key of Hasegawa into Doherty et al' s locking structure in order to lock/unlock the device.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Doherty et al (US Pat. 6,856,506) in view of Glynn (US Pat. 5,645,261).

Regarding claim 3, Doherty et al disclose all the subject matter of the claimed invention except for lock is a swivel lock. However Glynn discloses lock

is a swivel lock (see column 5, line 2). Therefore, it would be obvious to one of ordinary skill in the art to modify the swivel lock of Gynn into Doherty et al' s lock in order to lock the component into the given position.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Helot et al (US Pat. 6,430,038) teach computer with articulated mechanism.
